Manipulator is used as the additional attachment placed in the box of refrigerating truck. It enables the easy re-hanging of the pork halves and beef quarters from the aerial trail of the refrigerating truck to the customer aerial trail. Manipulator drive is hydraulic, aggregate is car electricity powered.

The main part of the manipulator is the rotary pillar with control arm and hydraulic aggregate. Elevation movement of the arm is served by the crew through 2 buttons; axial rotation is made by the crew. Whole device is made from stainless steel.

### **Technical data**

Column's height	2100 - 2400 mm
Supply voltage	12/55A or 24/28A
Drive	hydraulic
Loading capacity	180 kg
